

The smart way to manage your fleet

# Hi MATE

# HIGHER PRODUCTIVITY AND PEACE OF MIND – AT YOUR FINGERTIPS!

Your business cannot operate without a well-managed, smooth-running fleet of equipment. So how do you make sure that all your machines are properly protected, maintained and operating to their full potential? Hyundai's exclusive Hi MATE remote fleet management system gives you the services and support you need to do this on a daily basis. It allows you to monitor your equipment from a distance, providing data on the most essential working parameters along with useful supplementary information to optimise machine and driver performance.

Display only available for premium version

## How does it work?

Hi MATE uses mobile data technology to supply you with real-time information on every truck in your fleet. The system records data on machine location, operation and maintenance requirements, as well as driver behaviours. This information is available for you to access 24/7 via a dedicated website and mobile app.

Features & benefits

# PROTECT YOUR EQUIPMENT AND YOUR PROFITS

Powered by the latest digital and mobile technologies, Hi MATE supports your business goals by enhancing safety and security, minimising equipment downtime and optimising operational efficiency.

### Monitor your machines

Hi MATE provides real-time location information and tracks data such as key-on time, travel hours and work hours. This enables better monitoring and management of equipment and drivers on multiple sites. You can register machines in different groups and tailor the information you want to see.

The geofencing function will alert you immediately if a machine leaves a specified area. You can also secure your equipment with RFID card tagging or password protection.

### Optimise maintenance planning

Hi MATE provides machine status information linked to operating hours, including fuel reserve levels, failure codes\* and timing for servicing and replacement of consumables. It also allows you to configure an optimal service schedule for each individual machine. By making it easier to plan maintenance efficiently, Hi MATE reduces downtime, helps you to keep your operations on schedule and, ultimately, saves you costs.

\*All machine failures and their corresponding alarm history are stored on the system and sorted by date and description

### Improve worksite safety

To help prevent accidents, Hi MATE provides data on driver behaviours such as seat belt utilisation and driving speed. It also flags up any machine or maintenance faults, with alerts graded according to the seriousness or urgency of the fault.

### Support better driver performance

Hi MATE can improve driver productivity by enabling driver authorisation and checks, such as matching between self-diagnosis and equipment conditions before operation.

Options & technical information

# CHOOSE YOUR HI MATE REMOTE MANAGEMENT SYSTEM

Hi MATE is available for the following Hyundai forklifts:

**Diesel**

- 25/30/33/35D(A)-9
- 25/30/33D-9E
- 25/30/35D(N)-9V
- 35/40/45/50D(A)-9
- 35/40/45/50D(A)-9F
- 35/45/50D(N)-9VB
- 25/30/35L(N)-9A
- 40/45/50L-9

**Electric**

- All models except BTR-9 and BOP-7:
- 15/18/20BT-9U
- 16/20B-9
- 25/30/35B-9U
- 25/30/35BH-9
- 40/45/50B-9
- 16/20BRJ-9
