STAGE V AND BEYOND

Hyundai's new 9V Series is part of a fresh generation of forklifts complying with the European Stage V emission levels. But it goes much further than that!

Hyundai's engineers took a creative approach to develop an environmentally friendly machine that also offers reduced TCO (Total Ownership Costs). Savings are boosted with enhanced fuel economy and work efficiency.

The overall result is a **groundbreaking level of customer satisfaction** with **maximum performance** and **productivity**, higher **operator comfort**, better **safety** and **improved uptime management**.

Productivity & Efficiency

DURABLE AND FUEL-EFFICIENT TO REDUCE YOUR OPERATING COSTS

The Hyundai engineers have left no stone unturned in their efforts to save you costs and improve your productivity. The Hyundai legacy of reliable technology continues with an optimised engine and a new load-sensing hydraulic system developed to boost your profits through unprecedented efficiency.

Optimised fuel efficiency NEW

The 70D-9V and 80D-9V are equipped with a powerful 2.9L HMC D4CC diesel engine that produces 55 kW while complying with European Stage V environmental regulations. It also achieves **impressive cost savings** by delivering excellent performance with low fuel consumption rates.

- Featuring the optimal displacement for a forklift, the HMC D4CC engine comprises an electronic EGR valve, a common rail, Variable Geometry turbocharging (VGR) with an excellent boosting effect and an aftertreatment (DOC + DPF + SCR) device.
- The DPF regeneration works automatically.
- A parked regeneration can be activated manually at any time and monitored on the cluster.
- The driver can use a switch to prevent the regeneration process (hot exhaust gases) for working in an area with a potential risk of fire.

(70D-9V) ↑ **18%** (80D-9V) ↑ **23%**
FUEL EFFICIENCY

Aftertreatment
DOC + DPF + SCR

Improved visibility for efficient operation

- The view from the driver's seat has been optimised with side mirrors offering a better view of the rear wheel position.
- A triple separate (TS) mast is available as an option for improved visibility in overhead work.
- All masts are designed with 15° forward and 10° backward tilting for easy handling of various load types.
- When the load-sensing system is selected, the load weight is displayed on the cluster screen in real time. In the event of overload, a warning lamp flashes on the screen.

Load-sensing piston pump NEW

The engine is combined with a Casappa variable load-sensing piston pump in conjunction with a new MCV (mechanical or fingertip) from Buchholz. This hydraulic system, based on demand of flow, reduces the power take-off from the engine while driving and therefore the fuel consumption. Due to a higher pump-output, the working speed of all hydraulic functions has been increased. This results in **higher productivity with lower costs**.

Variable piston pump

Load-sensing MCV

New powertrain for enhanced performance and reliability NEW

The ZF 3WG94 transmission is equipped with an upgraded TCU for fast response and optimised shift control. The drive axle is **developed entirely by Hyundai Core Motion** and delivers superior durability and productivity.

- The new powertrain offers enhanced response, optimised transmission timing **and improved transmission system reliability**.
- The system meets EU Safety Regulation SIL 2.
- The system is controlled by a non-contact forward/backward lever designed for resistance to moisture and contaminants.

- The new Hyundai Core Motion drive axle provides **optimal rigidity and strength** for high-load work.
- The drive axle is equipped with a planetary reducing gear offering resistance to torque changes. The differential capacity has been increased for better performance and durability of the wet disc brakes.
- Thanks to its enhanced durability and long service intervals, the wet disc brake also reduces maintenance costs and downtime.
- The axle has a caliper-type auto-parking brake.

Operator Comfort

FIRST-CLASS ERGONOMICS FOR PRODUCTIVITY AND OPERATING PLEASURE

The cabin is designed to provide every operator with a comfortable environment that boosts productivity and reduces fatigue, even in tough working conditions. The most important controls are positioned within easy reach and a range of options helps you to tailor the cabin to your needs.

**Improved comfort
and convenience**

A **premium quality Grammar seat** is installed as standard, ensuring comfortable driving all day. A seat belt switch, armrest and seat heating are available as options. The inching and brake pedals have been moved for a more comfortable foot position, while additional vents under the steering wheel column improve heating in winter. The main console switches and storage have been rearranged for easy access to those used most frequently. The air conditioning controls are conveniently placed on the headliner side.

**Outstanding operability**

The new load-sensing MCV **improves controllability and working speed**. The RCV circuit open pressure has been lowered for precise fork control performance.

The fingertip controls have been adapted for easier operation and **quick, precise response** (within 0.1 seconds).

**Spacious and quiet with
an all-round view**

The 9V Series features a new deluxe cabin with several improvements to enhance **comfort and peace of mind**. The console layout has been adapted to improve accessibility and create more space for the driver. The front windscreen has a new, one-piece, curved design that creates a **wide, clear view** with reduced edge distortion. The side doors are composed entirely of glass, providing a better view to the sides as well.

Internal noise has been reduced by 5.2 dB, making it easier for the operator to concentrate and reducing fatigue.

Cabin noise
5.2 dB

**Colour monitor**

A new **colour monitor** with large icons allows the driver to check operating conditions and view any alerts quickly and easily. MCU controls are integrated for efficient operation of all equipment. An independent 7-inch digital rear view camera monitor is installed on the right side offering visibility behind the machine at all times. If a front view camera is added, this screen can be split to display both views.

**Reduced steering
wheel size NEW**

The **steering wheel diameter** has been reduced by 35 mm to **minimise shoulder fatigue**.

Safety

CREATING A SAFER WORKING ENVIRONMENT

Small details can make a huge difference when it comes to safety and security. The optional **seat-belt interlock system** available with the 9V Series is just one example. This new feature protects the driver by blocking all machine functions until the seat-belt has been fastened. Our ultimate aim is to help you to create a safe working environment and achieve the highest productivity possible.

Auto parking brake

The parking brake operates automatically when the power is disengaged in order to prevent accidents caused by human error.

Speed limiter

A speed limit can be programmed in advance and activated using a switch on the console.

OPSS (Operator Presence Sensing System)

- DRIVE LOCK
- LIFT LOCK
- TILT LOCK

The OPSS System restricts driving, lifting and tilting, and it kicks in **automatically when the driver leaves the seat** to prevent accidents. It operates in conjunction with the auto parking brake to contribute to a safer workplace.

Seat belt interlock system

NEW OPTION

The seat belt interlock system protects operators from injury by **restricting equipment** operation if the seat belt warning has not been observed or if the operator unfastens the seat belt while driving.

Machine position warning

While driving the machine-control-unit (MCU) senses longitudinal and lateral movement and **alerts the driver if the preset stability values are exceeded.**

Powerful service brake

The main brake is fully hydraulic and provides reliable, precise braking power with light pedal operation. The system has been enhanced with an additional pressure accumulator and improved emergency braking capability.

Passcode-protected start-up

Operators can restrict machine operation by setting a passcode. This **prevents theft, break-ins or accidents** that could occur due to unauthorised access when the machine is not in use.

Serviceability

BUILT FOR QUICK, EASY SERVICING

The peace of mind that comes with fast, low-effort servicing is an important part of the Hyundai 9V Series philosophy. These forklifts are designed to make maintenance as convenient as possible, with all components and materials optimised to ensure a long, trouble-free service life.

Easy inspection of aftertreatment device

For greater convenience, the counterweight opening has been made as large as possible. This **eliminates the need to remove the counterweight** for inspection or exchange of the after-treatment device.

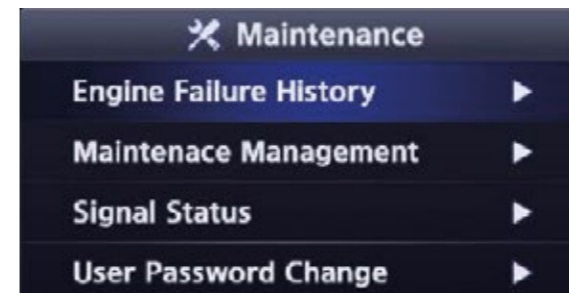

Low-maintenance hydraulic control valves

The load-sensing hydraulic control valves are designed for minimum leakage in lifting and tilting operations, descending speed control and emergency situations.

Auto tilting cabin

The **cabin can be tilted automatically** or manually by up to 52° to allow access to the power train and electric/hydraulic systems. To prevent accidental damage and protect the driver, cabin tilting is automatically disabled if the door is open.

Engine diagnostics and service scheduling

Maintenance Management				
Item	Interval	Elapse	Count	Alarm
Axle Gear Oil	100	105	0	●
Transmissing Oil	100	105	0	●
Filter	100	105	0	●
Tank Air Breathe...	250	105	0	●
Engine Oil	500	105	0	●
Element	500	105	0	●

Engine and transmission failure codes can be checked in the cluster with **no need for a separate diagnostic tool**. Replacement timing for consumable parts can also be set in the cluster. Operators will then be informed of upcoming servicing tasks through the display. This reduces downtime and increases peace of mind by making it easier to manage maintenance schedules.

One tyre size

The front and rear tyres and rims are the same size to reduce replacement part costs. This also means that, in the event of a rear tyre puncture, a front tyre can be used as a substitute on site.

Waterproof and dustproof fuse and relay box

All fuses and relays are centralised in an external container with **IP64 protection** against water and dust. This reduces the time needed for inspection and replacement.

Engine cover

A wing-type engine cover **reduces equipment downtime** by providing quick, easy access to the radiator and engine consumables.

Emergency lowering screw

The MCV is equipped with an emergency lowering screw allowing the fork to be lowered if the hydraulic system is damaged.

Walk-around

70/80D-9V**Productivity & Efficiency**

- Stage V 2.9L HMC D4CC diesel engine
- Casappa variable load-sensing piston pump
- Load-sensing MCV (mechanical or fingertip) from Buchholz
- Enhanced powertrain with ZF transmission and HCM drive axle
- Upgraded instrument cluster
- Better all-round visibility from driver's seat

Safety

- Seatbelt interlock system
- Auto parking brake
- Operator Presence Sensing System (OPSS)
- Machine position warning
- Speed limiter
- Rear-view camera
- Passcode-protected start-up

Operator Comfort

- Comfortable cabin with revised layout for added space and convenience
- Premium quality Grammer seat
- Reduced steering wheel size
- Large colour monitor
- Independent monitor for rear view camera
- Fine-tuned fingertip control
- Optimised foot pedal position
- Additional heating vents

Serviceability

- Auto tilting cabin
- Easy-access engine cover
- Enlarged counterweight opening
- Water and dustproof fuse and relay box
- Engine diagnostics and service scheduling
- Emergency lowering screw
- Interchangeable front and rear tyres

Parts & Warranties

HYUNDAI GENUINE PARTS AND WARRANTIES: THE BEST WAY TO PROTECT YOUR INVESTMENT

Hyundai Genuine parts, accessories and warranty programmes are specially designed to keep your investment covered. They increase uptime and maintain the performance, comfort, and convenience that are built into your equipment.

**Leader in standard warranties for Stage V forklifts!**

Hyundai warranties are designed to give you the cover you need to build your business with confidence and peace of mind.

Best standard warranties in the industry

For extra reassurance, and to ensure maximum customer confidence, we are supplying all new stage V models with very good standard warranties.

The forklift **standard warranty covers you for two years or 3000 hours, whichever comes first.**

Hyundai Genuine parts

Hyundai Genuine parts have the same design as those installed when your machine left the factory. They are subjected

to rigorous quality inspections and tests to make sure they meet Hyundai's strict requirements for quality and durability. As well as minimising downtime, this helps to ensure peak performance in every task. In the 13000 m² warehouse, **Hyundai covers over 96% of all Genuine Parts.** With one of Europe's most advanced automated warehousing systems, we are able to maintain availability and efficient delivery of all our Genuine Parts.

A network you can rely on

HCEE prioritises quick, reliable intervention to keep your equipment running reliably. Thanks to the **extended dealer network across Europe, we will always be close by to ensure a timely and efficient solution.** Moreover, we guarantee a 24-hour delivery service across our European dealer network.

SPECIFICATIONS

Main characteristics		
1.1	Manufacturer	Hyundai
1.2	Manufacturer's type designation	70D-9V
1.3	Drive : Electric (battery or mains), Diesel, Petrol, Fuel Gas	Diesel
1.4	Type of operation: Hand, Pedestrian, Standing, Seated, Order-Picker	Seated
1.5	Load capacity / rated load	kg 7000
1.6	Load center distance	mm 600
1.8	Load distance, center of drive axle to fork	mm 610
1.9	Wheelbase	mm 2300

Weights		
2.1	Service weight	kg 10083
2.2	Axle loading, loaded front / rear	kg 15036 / 2047
2.3	Axle loading, unloaded front / rear	kg 4338 / 5745

Tyres & chassis		
3.1	Tyres: Solid Rubber, Superelastic, Pneumatic, Polyurethane	P
3.2	Tyre size, front	8.25-15-14PR
3.3	Tyre size, rear	8.25-15-14PR
3.5	Wheels, number front / rear (X = driven wheels)	4 x 2
3.6	Tread, front	mm 1578
